

S3 Series

Drawing from the prestigious Hyperspik technology, we have created this new S3 Series. The solid and essential structure provides superb audio performance and its modularity allows you to enhance and customize the space between the shelves. The clean lines also can make it very pleasant the aesthetic result. Each of the stems it's composed of aluminum tube painted and filled with special damping material for a good "tune" with the shelves.

Solidsteel reserves the right to amend details of the specifications without notice in line with technical developments.

The WS-5 is a rock-solid platform delivering reference-level isolation at an attainable price, weighing in at a massive 28 lbs. Form follows function, the WS-5 supports even the heaviest of turntables. Heavy gauge steel for the perimeter and the massive wall plate are complemented by graceful touches adding air and life to what might otherwise have been a monolithic design.
